Human Trafficking at an All-Time High in the U.S., the #1 Destination in the World for Child Sex Trafficking

For a number of years now, the United States has had the notorious distinction of being the #1 destination for child sex trafficking, according to the State Department's own reports. But since the Biden Administration has been in office, the volume of human and child trafficking streaming across the U.S.-Mexican border has soared to unprecedented numbers. People in Texas were horrified earlier this week when an 18-wheeler was stopped and opened, revealing a stack of bodies of people who were being trafficked across the border but died inside the hot truck that had no air conditioning. Nearly 50 people died. And while the flood gates have been opened at the border allowing the smuggling of drugs and weapons, the most lucrative commodity being smuggled across the border, by far, are children. These children, referred to as unaccompanied minors (UACs), are processed by HHS right into the nation's lucrative child trafficking network called "foster care." During the first few months of the Biden Administration, there were reports that many of these UACs were being placed with foster parents, some of whom went public to report that they were being asked to house up to 26 or more of these UACs. We also reported how the corporations that were being awarded contracts by the new Biden Administration to process these UACs had previous links to child sex abuse. But the flow of UACs has become so large now, that the Biden Administration is spending huge amounts of money to house them in groups all across the United States, often spending more money on these UACs than American children who are U.S. citizens and suffering right now due to the economic downturn, and shortages such as infant formulas. For example, Kristinn Taylor, writing for The Gateway Pundit, reports that the Biden administration has signed a five-year lease to house illegal alien migrant children at the luxurious 100 acre campus of the closed American Hebrew Academy in Greensboro, North Carolina. What is seldom, if ever, reported however, is what is going to happen to these children who become part of the nation's lucrative foster care system. But we have documented what happens to these children for many years now. This very evil and very corrupt system called foster care, is where most of the nation's children who are sexually trafficked originate. And it is all supported by taxpayer funds.

Preparing for a "Black Market" Alternative Economy: Flea Markets, Swap Meets, Community Bartering

With the world's economic system currently on a pace for a total collapse, with the Globalists' stated goal of replacing currency and cash with Central Bank Digital Currencies, it is time to start thinking about an alternative "black market" that operates outside "the system" for those who do not want to become slaves to the Globalist billionaires and bankers. These are things like local farmer's markets, flea markets, and swap meets, where bartering can happen where people exchange goods and services. But to participate in this alternative "black market" economy, you need to have something to barter. This can be tangible items you own or produce, or it can be services you are trained to provide that most others do not have the training for. Those who know how to fix things and have abundant supplies of spare parts for things, are going to flourish in this kind of economy.

Utah Ritualized Child Sexual Abuse Investigation: Is There A History Of Ritual Abuse In Utah?

In the nearly 4 weeks since the Utah County Sheriff's Office announced an investigation into allegations of "ritualized child sexual abuse" in three Utah counties, they have received more than 120 tips in the form of phone calls, texts, and emails. UCSO Public Information Officer Sgt. Spencer Cannon told the Salt Lake Tribune that the office has "pulled in" sergeants with experience in sex assault cases to help review the information. The Last American Vagabond (TLAV) has been following the unusual situation since May 31st when the Utah County Sheriff's Office announced they were working with multiple county and federal agencies investigating reports of ritualistic child sexual abuse from as far back as 1990. The Sheriff's Office said the investigation began in April 2021. The investigation subsequently discovered previous reports alleging "similar forms of ritualistic sexual abuse and trafficking" that occurred in Utah County, Juab County, and Sanpete County during the time between 1990 and 2010.

Is Israel Planning To Relocate To Ukraine?

Chuck Baldwin: I quoted Ukraine President Volodymyr Zelensky as saying that when the Ukraine War is over, Ukraine will be a "big Israel." Of course, Zelensky is himself an Ashkenazi Jew, and Ukraine was the original home of those who became Ashkenazi Jews. Could it be possible that one of the motives behind the U.S. war in Ukraine is a potential relocation of Israel from Palestine to Ukraine? "Absurd!" you say. Maybe. Maybe not. America's evangelicals have been brainwashed by the pseudo-prophecy doctrines of Cyrus Scofield and who believe that the Israeli state born in 1948 is a fulfillment of Biblical prophecy and is a—no, THE—central prophetic sign of Christ's Second Coming. And the vast majority of political conservatives are brainwashed into believing that Israel is America's "greatest ally" in the Middle East and must be supported with American dollars and protected with American blood—at all costs. Both evangelicals and political conservatives are totally blind to the major role that Zionist Israel plays in the overall globalist machinations and agendas. This blindness is a source of grave cognitive dissonance within their own minds. They will do anything to support and defend the Zionist State of Israel, not realizing that Israel is one of the biggest enemies that America—and Freedom—has ever had and that it has done more to destroy our Christian culture and heritage, our economic stability and our constitutional liberties than any nation on earth. Therefore, what I will say from this point forward will be largely ignored or denigrated by both Christian evangelicals and political conservatives. So be it. What I'm writing about today is much more than mere fantasy. It is an idea being seriously discussed among geopolitical think tanks.

MonkeyPox Vaccine Has HIGHER Rates of Heart Disease Side Effects than COVID Vaccines and the CDC Wants to Inject them Into Your Children

Now that all age groups for children starting with babies 6 months old have been approved to be injected with the deadly COVID-19 vaccines, the CDC announced last week that they also want to start injecting children with a monkeypox vaccine. These are untested vaccines, and the rate of heart disease as a side effect, such as myocarditis, is even higher than the COVID-19 experimental vaccines. Here is what the CDC currently states regarding the rate of myocarditis and pericarditis after COVID-19 vaccination: "Over 350 million mRNA vaccines were given during the study period and CDC scientists found that rates of myocarditis were highest following the second dose of an mRNA vaccine among males in the following age groups: 12–15 years (70.7 cases per one million doses of Pfizer-BioNTech) 16–17 years (105.9 cases per one million doses of Pfizer-BioNTech) 18–24 years (52.4 cases and 56.3 cases per million doses of Pfizer-BioNTech and Moderna, respectively)" Of course, the CDC is lying, and we have shown this using their own data from the Vaccine Adverse Events Reporting System (VAERS) which reveals much higher rates of heart disease among young people than they are claiming. The two current vaccines approved for smallpox/monkeypox, however, have even higher rates of myocarditis. The CDC admits that the ACAM2000 smallpox vaccine has a rate of 5.7 cases of myocarditis per 1,000 doses administered. That's 5,700 cases of myocarditis per one million doses! The monkeypox vaccine they want to inject into children, Jynneos, according to the CDC's Dr. Brent Petersen, has zero cases of myocarditis. But according to Dr. Meryl Nass, he is lying (is anyone surprised?) Dr. Nass pulled the 200-page FDA licensure review of the Jynneos smallpox-monkeypox vaccine which documents two studies, and she found that these 2 studies of Jynneos found that 11% in one and 18% of recipients in the other had developed elevated levels of cardiac enzymes (troponin). This implies heart muscle damage of some kind. It was not studied further, and the reviewers admitted they did not know whether myocarditis was caused by the Jynneos vaccine, or not, and that they would need to perform future surveillance to find out. Just taking the lower of the two numbers, 11%, would produce 110,000 cases of heart disease per one million doses! We are well into the Globalists' population control by means of vaccines now, and America's children are in extreme danger from ignorant parents who still believe in vaccines.

Official Government Data Record 74,783 Deaths and 5,830,235 Injuries Following COVID-19 Vaccines in the U.S. and Europe

The European Medicines Agency (EMA) database of adverse drug reactions is now reporting 45,752 deaths and 4,522,307 injuries following COVID-19 vaccines, while the United States' vaccine adverse events recording system (VAERS) is now reporting 29,031 deaths and 1,307,928 injuries following COVID-19 vaccines. We know that as huge as these numbers are which are official government statistics, that they only represent a very small fraction of the total number of deaths and injuries suffered by those who chose to receive COVID-19 vaccines during the past 18 months. Last year, Dr. Jessica Rose did a comprehensive analysis to determine the "under-reported factor" in VAERS, and came up with 41X, meaning that the recorded data for adverse reactions to COVID-19 vaccines in VAERS had to be multiplied by 41 to get more accurate numbers. However, now that more time has elapsed since this study was performed, many feel that 41X is significantly too low, and should be closer to 100X, which is the number that was previously used based on a 2011 report by Harvard Pilgrim Health Care, Inc. for the U.S. Department of Health and Human Services (HHS). So if we take the publicly available data from VAERS and the European EMA and multiply by 100, these would be the true numbers of adverse events following COVID-19 vaccines: 7,478,300 deaths and 583,023,500 injuries in Europe and the U.S. Is there any evidence available to corroborate these kinds of numbers of people who died and were injured from the COVID-19 vaccines? Oh yes, there most certainly is! Former Blackrock Fund Manager Edward Dowd was one of the first to sound the alarm about the massive increase in payouts for life insurance and health insurance benefits in February of this year (2022), as insurance companies began reporting on their earnings from 2021, the year the COVID-19 vaccines were rolled out. We also published an article about a week ago from Margaret Menge reporting that a 163% increase in death benefits was paid out for group life insurance policies by the 5th largest life insurance company in the U.S. in 2021. This is creating tremendous shortages of human resources in the economy as the entire financial system is heading towards a collapse. When will the masses wake up to the fact that their governments and Big Pharma have an agenda, a very evil agenda, to reduce the world's population which is now a year and half old? And when they finally do wake up, will it be too late? Will they be sitting in a FEMA camp somewhere hoping that the government is going to give them enough food to stay alive?

US Supreme Court Declines Bayer/Monsanto Bid to Challenge Glyphosate Cancer Rulings

The US Supreme Court on Tuesday declined to hear a bid from Bayer-owned Monsanto that aimed to challenge thousands of lawsuits claiming its weedkiller Roundup causes cancer – a potentially costly ruling, AFP reported Tuesday. The high court did not explain its decision, which left intact a $25 million ruling in favor of a California man who alleged he developed cancer after using the chemical for years. The decision marks a major blow to the German conglomerate's legal fight against Roundup-related cases, and Bayer has set aside more than $15 billion to deal with a wave of US lawsuits linked to the weedkiller.

Why are the Nation's Pharmacies and Retail Outlets Refusing to Give the New FDA-Authorized COVID Shots to Babies?

Florida's largest private employer, Publix Food & Pharmacy, announced yesterday that they would NOT be giving the new FDA-authorized COVID vaccines to babies and toddlers between 6 months old and 4 years old. The Tampa Bay Times reports: "Since COVID-19 vaccines first became available, Publix has played a major role in tackling the public health emergency in Florida by offering vaccines to adults and, later, children as young as 5. But the Lakeland grocery company says it will not offer the vaccine approved for children ages 4 and under 'at this time.' Spokesperson Hannah Herring said Tuesday that Publix will not release a statement explaining its decision." Apparently Publix is not the only retail outlet in Florida refusing to inject babies with the toxic COVID shots. Brianna Andrews, writing in Jacksonville for News4Jax, reports: "Children under 5 years old are now eligible for COVID-19 vaccines, but some local parents say they are struggling to find appointments to get them. News4JAX called a dozen local pharmacies in the area, and none of them offered the vaccine for children under 5. They told us they did not intend to." And while this hesitancy to inject babies with COVID experimental shots is at least somewhat understandable in Florida, where the State announced they were not supplying the shots through the Health Department, national retail outlets are also seemingly hesitant to inject babies and infants. According to an article published on Axios yesterday, Walgreens, Costco, Rite Aid, Walmart, H-E-B, Hy-Vee, and Wegmans are only offering the shots to 3 and 4-year-olds, but not 6 months old through 2. CVS offers the shots for children as young as 1.5 years old, but apparently not babies younger than that. Why are these retail outlets refusing to inject the babies now that they are authorized by the FDA? Publix refused to explain their decision, suggesting that this is a legal can of worms. Hospitals are apparently the only ones injecting the babies. Is it because they have Neonatal Intensive Care Units (NICU) to handle the casualties, while retail outlets do not?

Keeping Moms With Their Newborns: A Team of Washington Lawyers and Advocates Works to Avoid Foster Care Separation at Birth

When Jennifer Justice went into labor with her fourth child in 2020, she was determined that child protective services would not take this baby away. Two of the Washington mom's older sons lived with their grandparents, and social workers had removed her third child shortly after birth due to her opiate addiction. After the courts terminated Justice's parental rights to that child, she had plunged into a deep depression, lost her job and then her home. This birth, however, would be different. Justice had started drug treatment and someone new was by her side: a lawyer. "When the social worker first came in, and I tell her, 'I have an attorney,' their whole demeanor changed," Justice, now 38, recalled. "I felt protected, I felt like I had arms around me and my child."

Families Sue Governor DeSantis and State of Florida for Medically Kidnapping Their Children

We recently reported how Florida Governor Ron DeSantis threatened parents in his state who took their children to "family friendly drag shows" by stating that he would ask Child Protection Services (CPS) to investigate these parents for "child endangerment," although he has not issued similar threats against parents who choose to inject their children with deadly COVID-19 vaccines. Last week, Katie LaGrone with WPTV Channel 5 in West Palm Beach reported on a lawsuit with multiple families suing Gov. DeSantis and the State of Florida for medically kidnapping their children. This problem of state-sponsored child kidnapping and trafficking, is systemic in Florida, and NOT rare. "It's happening all over Florida," said attorney Octavia Brown of Community Law for Families and Children. She's part of a team of attorneys who filed the complaint. When LaGrone suggested the lawsuit accused kidnapping by and within the system, Brown responded "what else do you call it? If there is someone who is connected to the system and they see a child that they want, they are going to get the child." Brown is also a former insider who worked as an attorney for DCF and other agencies representing Florida's foster care system. She explained how some staff members who collaborate to deliberately keep a child from being placed with biological relatives can get away with it. "This system is so bogged down", she said. "When they [system staff] come in with these false stories or they come in with false allegations of caregivers having backgrounds, the judge is not going to say 'oh let me look into that home study or let me look into that criminal record," she explained. Brown said young parents and poor families are most vulnerable to what they dub as "internal diversion" practices. "Because those families don't have the money to fight the bogus allegations," Brown said.
